

Artwork Requirements

Preferred file format:

1. **AI, PDF or EPS** files from Adobe Illustrator. When submitting digital art in this format please convert text to paths/curves.
2. **CDR, PDF** files from Corel Draw (cdr, pdf). When submitting digital art in this format please convert text to curves.
3. **PDF** files. Made from Illustrator or Corel Draw will be editable and scalable. Convert text to paths, curves or outlines.
4. **EPS** files. Made from Illustrator or Corel Draw will be editable and scalable. Convert text to paths, curves or outlines.

Files should be saved for PC when using a Mac.

Accepted Files BUT MAY NOT PRINT AS EXPECTED:

PSD, TIF, JPG, JPEG, PNG, GIF files are not scalable and are typically photographs. Trying to scale these files will cause low resolution results (pixelated). **They need to be actual size at 100dpi or more. (300dpi at smaller size)**

These files may have to be manipulated in order to get your desired look which will result in an extra fee. If submitting a file that is in kilobytes “kb”, it is probably too small to reproduce with a good result.
